## AutoCad Drafting & Consulting Services

Free-Lance Cad Drafting at Reasonable Rates

I have been using AutoCad for over 20 years. I can take your concept or rough sketches and create the Cad documents you need. I am currently running AutoCad 2019.

My experience as a drafter includes, Civil, Electrical and Architectural. I have compiled Construction Documents consisting of Site Plans, Floor Plans, Elevations, Sections, and Details and I am very familiar with the use of Xref's, Blocks, Templates and Layers.

I am also available to come into your office and streamline your Cad system making it more efficient as I train your staff in efficient use of xref's, transmitting files and file organization.

For rates & availability, contact me by phone or email
